

**AMENDMENTS TO THE CLAIMS**

Please amend the claims as follows.

What is claimed is:

1. (Currently Amended) A portable object comprising a first side and a second side of the portable object, the first side of the portable object being provided with a first electronic information support, ~~the portable object being characterised in that the first side is further provided~~ and with a second electronic information support.
2. (Currently Amended) The portable object according to claim 1, wherein the first and second electronic information support are aligned.
3. (Currently Amended) The portable object according to claim 1, wherein characterised in that the first electronic information support comprises a support body in which an integrated circuit is inserted, and wherein the integrated circuit is arranged to store and/or process data is inserted.
4. (Currently Amended) The portable object according to claim 1, wherein characterised in that the first electronic information support is arranged to be detached from the portable object.
5. (Currently Amended) The portable object according to claim 1, wherein characterised in that the portable object has the shape of a right parallelepiped with the format of a smart card as defined in International Organization for Standardization standard ISO 7816.
6. (Currently Amended) ~~The p~~portable object according to claim 2, wherein characterised in that the first electronic information support is a second generation 2G-SIM card.
7. (Currently Amended) ~~The p~~Portable object according to claim 6, wherein characterised in that the second generation 2G-SIM card comprises a precut area.
8. (Currently Amended) A mMethod of manufacturing a portable object, the portable object comprising a first side and a second side, the method comprising:

a first cavity creation step, in which a first cavity is created in the first side of the portable object; and ~~[[,]]~~

~~characterised in that the method further comprises~~ a second cavity creation step, in which a second cavity is created in the first side of the portable object.

9. (Currently Amended) The method according to claim 8, ~~characterised in that the method further comprising~~ comprises an embedding step in which modules are inserted in the first cavity and in the second cavity.
10. (Currently Amended) The method according to claim 8, ~~wherein characterised in that the~~ cavities are created by milling.
11. (Currently Amended) The method according to claim 8, ~~wherein characterised in that the~~ cavities are created by ~~molding~~ moulding.
